Dear Jim,

RE : GUIDE TO BEST PRACTICE IN RISK MANAGEMENT

Thank you for giving both Vero and Aon the opportunity to review the above risk management program.

Vero view risk management and its application as a very important factor when assessing whether to offer Professional Indemnity cover. We believe the above program designed by Red Gravel Publications is a very innovative risk management tool and would provide great benefits to all building designers and architects.

We would encourage all building designers and architects to utilise the program and would certainly look favourably upon clients who demonstrate implementation of the program as part of their daily risk management routine.

Yours truly,

A handwritten signature in black ink, appearing to read "Jim Fouras", written over a dotted line.
